

## **LABORATORY TECHNICIAN**

Antibody Engineering, Cambridge, UK

### **F-STAR**

We are an antibody engineering company focusing on the development and exploitation of our innovative Modular Antibody Technology to discover and develop new and improved antibody therapeutics. The company was founded in 2006 in Vienna, Austria, by experienced antibody researchers and biotechnology executives. Backed by very strong venture capital funds, f-star has raised EUR 13m since inception. We are currently a small team determined to build a world class research and development company.

### **POSITION**

We are looking for a laboratory technician to join the newly formed research group located at the Babraham Institute (Cambridge, UK) that utilizes molecular diversity and protein engineering techniques for the development of new therapeutics.

### **RESPONSIBILITIES**

- Wash up, autoclaving and general supply of lab glassware
- Keeping stock of lab consumables, media and plates
- Ordering of lab and office consumables, organizing accounts and deliveries
- Maintenance and general keeping of lab instrumentation, liaising with technical support

### **REQUIREMENTS**

- practical experience in solutions and media preparation
- basic knowledge of spreadsheets, word processing and basic PC skills
- strong communicational, organizational and research skills
- attention to detail
- proven ability to work with others
- positive attitude to learning and troubleshooting new methods

### **APPLICATION**

This is an exceptional opportunity to join a fast growing biotechnology company that is at a decisive stage in its development and to help shape a future leader in the field of antibody engineering. To apply, please send a cover letter and a detailed CV to [cambridge@f-star.com](mailto:cambridge@f-star.com).
